Natural refrigerant gases

With totally natural refrigerants (HC) such as R290. An ecological choice, with the added advantage of a more silent compressor and ensuring a longer life to entire refrigerant apparatus.

Supply point

For bottles and carafes up to 37 cm.

Drip tray

With adjustable height drip tray for ease when filling bottles and carafes. A drip tray with direct waste discharge is available upon request.

UV out

A UV light at end of every tap. As demonstrated by numerous studies, UV light acts as a strong steriliser therefore preventing the growth of bacteria.

Cabinet*

With optional cup dispenser. Inner bracket for mounting filters and the CO₂ cylinder. Adjustable feet. WxDxH (mm): 318 x 485 x 944

*Only for ECOCHIC I.T. 80 and ECOCHIC BEER TAP 80

Energy Saving

The optional stand-by function will reduce power consumption by 75% in comparison to that of full operating power. Making for enormous savings whilst maintaining the temperature at a low enough level to impede the proliferation of bacteria.

Ice Bank

Icebank is the highest performing professional cooling technology, an absolute necessity in any hospitality situations where large quantities of cold water are required. This is obtained through immersion of the serpentine water coils for the water and refrigerant gas being immersed in an ice bank.

UV filtration in line (12W)

In line UV light.

Sanitizing and cleaning

Sanitizing and cleaning products for the plants.

Active carbon filters

Purifies the water making it crystal-clear, removing odour and taste impurities. It totally eradicates any impurity with a size of 0.5 microns, eliminates all odours and unwanted tastes such as chlorine, asbestos fibres and number of microorganisms including crypto-sporidium.

- Everpure 4C (capacity 11.000 lt.).
- Everpure AC (capacity 2.800 lt.).

UVC lamp at exit (4W)

A UV light at the end of every tap. As demonstrated by numerous studies, UV light acts as a strong steriliser therefore preventing the growth of bacteria.

Nano Silver pipe

Stainless steel tube AISI 316L with an innovative nanotechnology-based SILVER ion treatment on the surface. Silver is naturally bacterio-static and so reduces bacterial growth in the pipe. The surface treated with these nano particles is much more compact and smooth: this prevents the formation of deposits, biofilm or bacterial colonies and because the water flows better through the tube, also reduces dripping at the end of dispensing.

Pressure reducers

CO₂ pressure reducer for refillable or single-use cylinder, water block, water pressure reducer.

The quality of our water-coolers has been certified and awarded by the most important international certification bodies in the sector. A further guarantee for those who buy them and those who use them, and a source of pride for us as we reach for maximum results by focusing on **avant-garde technology, design and ecology.**
